JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## SIAM.

## BANGKOK—Cholera.

The following information was received from the Department of State, under date of June 16:

The American legation at Bangkok reported, May 3, that 127 deaths from cholera occurred at Bangkok during the week preceding the date of the report.

## SIERRA LEONE.

## FREETOWN—Quarantine against Sekondi, Gold Coast.

Consul Yerby reports, May 16:

Quarantine was declared May 14 against all vessels having touched at Sekondi, Gold Coast, on account of the presence of yellow fever at that place.

## URUGUAY.

## MONTEVIDEO—Smallpox.

The following communication, dated May 2, was received from the Department of State under date of June 13:

Smallpox continues present in the suburbs of Montevideo and has recently invaded the center of the city. The chief point of infection is the suburb of Villa Muñoz, where from 5 to 15 cases are reported daily, many of these being of the hemorrhagic form. According to the latest official returns the total number of cases in the district for the first four months of the year 1910 was 590, as compared with 290 cases for the whole of the year 1909. As a rule the disease is limited to persons who have not been vaccinated. Many cases have occurred in the towns in the interior and the disease has recently appeared at San Carlos, which is situated near Maldonado in close vicinity to the anchorage ground of the foreign war vessels which are expected to be present at the time of the Buenos Aires centennial celebration.

## ZANZIBAR.

## ZANZIBAR—Examination of Rats for Plague Infection.

Consul Garrels reports, May 5 and 10:

Weeks ended April 30 and May 7. Rats received, 1,806; necropsied, 1,796. No plague infection found.
